Contents

1 Who We Are

Ash Systems helps organizations deploy practical AI that improves outcomes fast. We combine advanced models with strong delivery to modernize operations and create measurable value.

2 What We Do

2.1 AI Chatbots & Virtual Assistants

24/7 customer and employee support, knowledge assistants, guided onboarding, and sales support with secure retrieval and analytics.

2.2 Intelligent AI Agents

Multi-agent automation for operations: supply chain, fraud, finance back-office, and executive productivity (scheduling, briefs, KPI surfacing).

2.3 Data Science & Analytics

Forecasting, churn prediction, pricing optimization, and sentiment analysis with real-time BI dashboards and experimentation.

2.4 Process Flow Automation

LLM+RPA hybrids for document processing, ticket triage, routing/approvals, and order-to-cash.

3 How We Build

- **LLMs** for language understanding and generation.
- **RAG** for trustworthy, up-to-date answers from your knowledge.
- **MCP** for agent collaboration on complex tasks.
- **MLOps** for safe, observable deployments and model updates.

4 Who We Help

- Financial Services — fraud/risk assistants, claims automation.
- Retail & E-commerce — discovery bots, returns automation.
- Logistics & Manufacturing — supply optimization, maintenance.
- Healthcare — patient support, document assistance.

5 Why Ash Systems

- **Outcome-first** — initiatives scoped around KPIs.
- **Secure & compliant** — RBAC, audit trails, private networking.
- **Faster time-to-value** — accelerators for chatbots, agents, and analytics.
- **Co-creation** — we build with your team to transfer capability.

6 Getting Started

1. Choose a high-impact use case.
2. Share sample data and tooling constraints.
3. Co-design a 4–6 week pilot with success metrics.
